

Compact Ball Valve

No.	Part Name	Qty.	Material
1	Body	1	PVC
2	Seat	2	Santoprene®
3	O-Ring	1	EPDM
4	Ball	1	Polypropylene
5	Handle	1	ABS
6	Bolt	1	S1018
7	Handle Cap	1	ABS

Applications

- For closing and opening of lines supplying water and commonly used fluids such as fertilizer and diluted acid solutions.
- Well suited for both hot and cold weather conditions.
- Used as flush/drain valve at the line end.
- NSF compact ball valves (1/2" – 2") are also suitable for pool and plumbing applications.
- Valves available for various flow control applications are: Compact Ball Valves, True Union Ball Valves, Single Union Ball Valves, and Butterfly Valves.

Features & Benefits

- Made of uPVC (*) with additives to provide impact strength and protection from harsh weather.
- These unplasticized valves manufactured in gray color, are highly resistant to UV radiation, stronger and longer lasting than white PVC valves.
- Santoprene® synthetic rubber (EPDM) seats provide outstanding resistance to heat, aqueous solutions of acids, bases and alkalis. EPDM allows perfect seal against polypropylene (PP) ball.
- The PP ball provides high resistance to fatigue and longer life.
- Available in ANSI socket or NPT threaded ends.
- Recommended for pressurized lines up to 150 psi/10 bars (PN10) of operating pressure.

*** All valve bodies in this brochure are made of uPVC.**

Note: All dimensions are in inch.

Features & Benefits

2 Piece Ball Valve

- The 2-piece ball valves require as low as half the torque to turn handle.
- EPDM seats provide outstanding resistance to heat, aqueous solutions of acids, bases and alkalis, as well as create perfect seal against polypropylene ball.
- The PP ball provides high resistance to fatigue and longer life.
- Available in ANSI socket or NPT threaded ends.
- Recommended for pressurized lines up to 150 psi/10 bars (PN10) of operating pressure.

True Union Ball Valve

Features & Benefits

- Full port design causes least head loss through the valve.
- Double unions provide ease of installation and maintenance.
- Teflon[®] seats have superior resistance to heat, fertilizer and acid solutions, bases and alkalis as well as against aggressive chemicals in commercial applications.
- These seats provide excellent seal on PVC ball.
- Available in ANSI socket or NPT threaded ends.
- Recommended for pressurized lines up to 150 psi/10 bars (PN10) of operating pressure.

Butterfly Ball Valve

Features & Benefits

- Available with lever handle (2" to 8") and with worm gear wheel (8" to 12") for various applications.
- Lever handle has disk position indicator for estimating and setting flow rates.
- PP gate gives a leak-proof seal against EPDM seat.
- High impact resistant body safely handles continuous operating pressure up to 150 psi/10 bars.

Note: All dimensions are in inch.

Features & Benefits

- Available in larger sizes 8" to 12" for smooth and easy opening and closing.
- PP gate provides leak-proof seal against EPDM seat.
- High impact resistant body safely handles continuous operating pressure up to 150 psi/10 bars.

Butterfly Valve with Gear Wheel

Other PVC Products

Note: Please Contact Valplastic USA for any details on these products.

V-Rain® valves are manufactured under ISO 14001 Corporate Management System requiring measurement and documentation of environmental impact of manufacturing activities. We hope such actions today would bring us a better tomorrow.
